FARMSCAPING ON JUNETEENTH

Beginning at 9:00 A.M. - Friday, June 19, 2015

"FARMSCAPING is the deliberate use of plants and landscaping to increase diversity of habitats to encourage and conserve beneficial organisms to help prevent damage to crops by pests and insects.".....Geoff Zehnder, Clemson University

JUNETEENTH 2015: We celebrate and honor our legacy and heritage as children of slaves walking into a brighter future by the Grace of God. Today we celebrate together, we come together, we work together, and we eat together. Our fore-parents would be proud to see our day.

Enjoy! *W.J. & Doris Sauls, Proprietors*

ACTIVITIES

Group I: Construction of the 22 arch steel tool shed by Steelmaster – **tools needed:** drills, braces, and scaffolding
